WATER DISCHARGE APPROVAL

Stealth Energy Inc. (“Stealth” or “company”) announces that its application to discharge water on surface at the Little Basin (Hailstone) gas project in Stillwater County has been favourably considered by the Montana Department of Environmental Quality. The company has now received its first written authorization for discharge, an essential element of which is the high standard of water quality involved.

Randy Sealey, Stealth Operations Manager, states: “This all helps the bottom line as it saves the company from having to make alternative discharge arrangements and augers well for the future, as a large number of gas wells should be similarly considered.”

Stealth Energy Inc. is a producing oil & gas company with its field office in Billings, Montana, USA. The company develops its own properties and continues to seek and make acquisitions, primarily within Montana and Wyoming. For further information please contact Carlo Nigro at (604) 669-7831 or stealthenergy@telus.net.
